

COLD-GAL

CHEMTOOLS HIGH PERFORMANCE Cold Gal, liquid cold galvanising is a zinc rich coating containing metallic zinc. It prevents rust and corrosion caused by welding and exposure to harsh environments. The unique blend of 99% zinc purity dust in an epoxy resin formulation produces a film which provides years of protection.

PRODUCT INFO

CHEMTOOLS Cold-Gal chemically bonds with iron and steel, and actually fuses with the base metal to provide rust and corrosion resistance. Cold-Gal can also be used as a primer for most paints and is available in a spray pack or in bulk sizes.

PART NO	PACK SIZE	APPEARANCE	SOLIDS CONTENTS	Low Sheen Gloss
CT-CG400	400g Aerosol	Matt Grey	>50%	Paint Type - Epoxy
CT-CG1L	1L	Matt Grey	>84%	Propellant - Hydrocarbon
CT-CG4L	4L	Matt Gray	>84%	Touch Dry 15 - 30 Mins
				Dry to Handle - 1Hour

FEATURES:

1. High performance, highly resistant to salt corrosion and water.
2. Used as a primer on most metals, may be top coated with conventional brush coats including Silver-Gal.
3. Lasting protection against corrosion.
4. Dry to touch in 15-30 minutes and dry to handle in 1hour.

WHERE SHOULD THE PRODUCT BE USED:

- ✓ Galvanised Surfaces
- ✓ Gutters and Fences
- ✓ Bridges
- ✓ Structural Steel and Wrought Iron
- ✓ Welded Joints
- ✓ Marine Surfaces
- ✓ Automotive
- ✓ Industrial Piping and Tanks
- ✓ Power Plants/Transmission Towers and Refineries
