3M™ Speedglas™ Welding Helmet — Product Overview

The Speedglas auto-darkening welding filter was one of the first of its type on the market, bringing a new standard to eye protection and comfort for welders.

Today, there is a great family of Speedglas welding helmets, each model with its specific series of welding filters:

Welding Helmets

Auto-Darkening Welding Filters

Accessories

Every welder is different, and each day a welder's tasks can change. As owner of a Speedglas welding helmet, you have a variety of accessories available to help increase your protection and comfort.

The following pages list virtually all of the Speedglas replacement parts and available accessories.

Compatibility of Air Delivery Units and Headtops

The new Speedglas Welding Helmets 9100 Series feature the QRS Breathing Tube (Quick Release Swivel), which enables one-handed connection and release. The SG-30W breathing tube comes standard with complete Adflo™

PAPR HE and Fresh-air III supplied air systems. The SG-50W is standard on the Adflo™ PAPR HE/OV-AG systems and the SG-40W breathing tube is an option for more demanding conditions

Adapter

Breathing Tubes

Headtops*

WELDING TECHNOLOGY

*The SG-50W breathing tube is required when used with 3M™ Adflo™ PAPR with HE filter and OV/AG Cartridge and 3M™ Speedglas™ Welding Helmet 9100-Air. It is not NIOSH-approved with V-Series Supplied Air valves.

Care and Maintenance

Every day welding sparks, heat, fumes, and normal wear-and-tear grind away at your protection equipment. Therefore, we designed all 3M™ Speedglas™ Personal Protective Equipment with ease of maintenance in mind. All replacement parts can be installed by hand, without tools. For maximum safety and comfort, make it a regular habit to check and change the following items at the intervals recommended below.

System	Component	Typically replaced	Notes
Welding Filters	Outside Protection Plate	Once a week	Replace anytime the plate becomes deeply pitted, scratched or too dirty to clean with soft cloth or lens paper.
Welding Filters	Inside Protection Plate	Once a month	Regularly clean with a soft cloth and replace if any pits or scratches occur.
Welding Helmets	Visor Plate	Every two weeks	Replace more often if visibility is reduced.
Welding Helmets	Sweatband	Once a month	Replace more often if sweatband becomes unhygienic.
PAPR	Prefilter	Once a week	Regular replacement of the prefilter extends the life of the particle filter, saving money while also increasing the battery run-time.
PAPR	Particle Filter	At least every month	For Adflo, replace when particle filter indicator becomes red. Otherwise, replace whenever the battery operating time becomes too short, or when "fully loaded" filter triggers low airflow alarm.
PAPR	OV/AG Cartridge	At least every 3 or 4 weeks	Immediately replace the cartridge any time you can smell odors while wearing the PAPR.
PAPRs	Spark arrestor	As needed	Replace if deformed and no longer fitting well.
Respirators	Breathing Tube	If damaged, deformed or leaking any air	To extend the life of breathing tube, use a tube cover or a heavy-duty rubber breathing tube.
Welding Helmets with PAPRs	Face Seal	At least every 2 months	Replace earlier in really dirty environments or whenever the seal becomes unhygienic.

Important information. Note that higher-than-normal levels of pollutants, heat, and sparks will require more frequent replacement of components. Chart assumes minimum 4 hours usage per day. Ordering information for each series of welding helmet can be found in the Parts Directory.

⚠WARNING

This product is designed to help protect the wearer's eyes and face from harmful radiation including visible light, ultra-violet radiation (UV), infra-red radiation (IR), sparks and spatter resulting from welding processes. These products must be used only by qualified persons who are properly trained in their use and maintenance. Misuse may result in permanent eye injury and vision loss. Always wear ANSI Z87.1 compliant safety spectacles in addition to any welding helmet. For proper use, see supervisor, or User Instructions or call 3M in U.S.A. 1-800-243-4630. In Canada, call Technical Service at 1-800-267-4414.

⚠WARNING

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the User Instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For proper use, see packaging instructions, supervisor, or call 3M OH&ESD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.
