 **Speedglas™**

The optics that forever changed the way welders see are now available in the helmet that changed everything...

See your welds in a new light, with more contrast and natural-looking colours.

3M™ Speedglas™ True-View Technology allows you to see your weld pool with a view that appears lighter, brighter and more realistic. Read surfaces and contours better with a view that must be seen to be believed.

The classic, streamlined Speedglas 9000 design

3M™ Speedglas™ Welding Helmet 9002NC

You asked and we listened. The award winning Speedglas 9000 welding helmet changed the game in helmet design by introducing the perfect combination of helmet shape, size, and weight still preferred by welders today!

So we've brought it back. The exact same narrow shell profile many welders love only with advanced optics, less weight, more comfort and a new look!

Better control

An improved optical experience with Speedglas True-View allows better control over your welds.

Exhale

Thanks to the exhaust vents built into the helmet, the build-up of carbon dioxide is reduced, keeping you more comfortable and the lens fog free.

Freedom of movement

The classic slim, light-weight design increases your freedom of movement. Plus, the exhaust vents allow for a close-to-the-face fit.

The best made affordable

3M™ Speedglas™ Technology and state-of-the-art auto-darkening optics at a price point within reach of every welder, from apprentices to seasoned veterans.

Custom comfort

Ratchet mechanism and multiple adjustments for a customised fit.

Speedglas Welding Helmet 9002NC Specifications

Light-weight: 485g

Shades: 3 / 8, 9, 10, 11, 12

Lens viewing area: 55 × 107 mm

Optical Rating: 1/1/1 with True-View

Welding applications: MMAW, MIG/MAG, TIG and low amp TIG (1 Amp)

Approvals: Welding Protection - AS/NZS1338.1, Eye/Face Protection - AS/NZS1337.1
