Overview

The VIPER ARC140 from Xcel-Arc is a new generation, low cost welding machine produced using modern IGBT inverter technology. Designed to meet the needs of the price conscious non-commercial user without compromising on quality, this machine is as reliable and robust as you would expect a machine bearing the Xcel-Arc name to be. The DC MMA welding function delivers a smooth and incredibly stable arc, allowing easy welding with electrodes producing high quality welds including cast iron, stainless steel and low hydrogen. Connection of the optional XA17V Tig Torch allows basic scratch-start DC-TIG welding of steel, stainless steel, bronze and copper. The unique electronic design structure and air channel design in this machine speeds up heat dissipation, improving the duty cycle of the machine and reducing dust ingestion by the fan, thereby improving the reliability of the machine. The VIPER ARC140 is an exceptional machine for the price and is suitable for a wide range of applications including light fabrication, farming and whatever else a Kiwi bloke might be working on in his shed. The VIPER ARC140 offers great portability with the power to get the job done and with the convenience of being fitted with a 10 amp domestic plug. Designed and built to our specification and manufactured in compliance to AS/NZ60974-1.
